McAfee   **Dec 2019 – March 2020**
Software Development Engineer

Project: SSO (OpenId Provider for McAfee)
Handled
- Developed Web API's in .net core 3.1.
- Wrote scripts in JMeter for Performance testing and Load Testing
- Automated API testing using Postman.

cloudThing India   **OCT 2017 – Nov 2019**
Software Engineer

Project: VOLTI3 Client Portal
Handled
- Quickly grasped functionality of existing backend code, thereby beginning to work on development of backend functionality for upcoming new modules as well as resolving existing defects.
- Organize daily status call with other team members, thus providing status of assigned tasks

Project: VOLTI3 Candidate Portal
Handled
- Developed B2C Environment for Authentication and Authorization.
- Developed Azure Function app for initial data load in Redis cache.
- Developed Repository for Azure Blob Storage.
- Developed Repository for Microsoft Graph.
- Developed and used ADO.Net objects for handling database activities.
- Daily status report to client and status call.
- Handled sessions to provide knowledge transfer to the clients.

Project: Peerz MVP
Handled
- Developed Azure Logic APP.
- Developed ASP .Net Core API APP.
- Used Azure AD Authentication.
- Developed Repository for pulling data from google pub sub.
- Developed Repository for Pay Mentors using Paypal SDK.
- Used Azure Key Vault for storing sensitive data.

Project: buildThing (Azure Devops build task)
Handled
- Refactored the existing code.
- Added new features and bug fixes.
- Ran SonarQube against solution and fixed all the issues.
